Forecast for Wednesday 10 Jul 2024

Weather: Mainly cloudy with some drizzly showers, especially in the west. Occasional brighter intervals in more eastern parts. Feeling on the cool side for July with a fairly brisk westerly breeze, locally strong over the summits.

Chance of cloud-free hill tops above 600m: 20% slowly becoming 70%.

Low cloud and visibility: Widespread cloud above 300-500m during the morning, most persistent in the west. Cloud lifting to periods above 500-700m by the afternoon. Often good visibility at lower levels but occasionally poor or very poor at higher levels, especially during any showers or periods of drizzle.

*Level above which ground is expected to be frozen/snow is expected to settle.

Meteorologist's View

Low cloud will bring occasionally poor visibility across the peaks and make for challenging navigation on higher ground. Perhaps some high UV levels in any brighter spells.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 11 Jul 2024

Weather: A cloudy start with a risk of some drizzle, but probably turning a bit brighter than on Wednesday. A mixture of cloudy periods and sunny spells with the chance of an afternoon or evening shower.

Maximum wind: Westerly or northwesterly 15-20 mph.

Chance of cloud-free hill tops 600m: 40% becoming 90%.

Low cloud and visibility: Periods of cloud above 500-600m at first, but cloud mostly lifting above summits. Patches may form above 800m in association with any late showers. Very good visibility in general, but locally very poor in cloud and moderate in showers.

Temperature: **Valleys:** Plus 12 Celsius rising to plus 18 Celsius.
At 600m: Plus 9 Celsius rising to plus 12 Celsius.
Freezing level: Well above the summits.
